

JAM Construction - Operational Procedures Manual

Client Onboarding Process

Step 1: Initial Consultation (Day 0)

- Receive client inquiry via phone, email, or referral
- Schedule 30-minute initial consultation
- Discuss project scope, timeline, and budget requirements
- Explain our process and pricing structure
- Determine if project is a good fit

Step 2: Project Qualification (Day 1)

- Gather project details: size, type, complexity, timeline
- Assess our capacity and expertise match
- Confirm project falls within our service scope
- Determine preliminary fee based on project size
- Schedule project kickoff meeting

Step 3: Contract Execution (Day 2)

- Prepare detailed proposal with scope of work
- Include timeline, deliverables, and pricing
- Send contract to client for review and signature
- Receive signed contract and deposit if required
- Enter project into project management system

Estimating Process Standards

Phase 1: Document Review (Days 3-5)

- Thoroughly review all plans, specifications, and addenda
- Identify missing or unclear information
- Request additional information from client if needed
- Create initial project outline and checklist
- Estimate time required for complete estimate

Phase 2: Quantity Takeoff (Days 6-12)

- Perform detailed material takeoffs using digital tools
- Verify measurements and quantities independently
- Cross-reference with historical data for accuracy
- Document all assumptions and exclusions
- Create detailed quantity reports

Phase 3: Pricing and Assembly (Days 13-16)

- Apply current material costs from supplier quotes
- Factor in labor productivity rates for local market
- Include equipment, permit, and miscellaneous costs
- Apply appropriate markup for overhead and profit
- Prepare detailed cost breakdown by trade

Phase 4: Quality Assurance (Days 17-18)

- Independent review by senior estimator
- Verification of calculations and assumptions
- Check against similar historical projects
- Review with client for clarification if needed
- Finalize estimate with supporting documentation

Phase 5: Delivery (Day 19)

- Prepare professional estimate report
- Include executive summary and detailed breakdowns
- Provide digital and printed copies as requested
- Conduct delivery meeting to explain estimate
- Provide post-delivery support as agreed

Quality Control Standards

Accuracy Requirements

- All measurements verified twice
- Quantities cross-checked with plan dimensions
- Unit prices validated with current market rates
- Total calculations verified independently
- Final review by senior team member

Documentation Standards

- All assumptions clearly stated
- Exclusions specifically identified
- Source of unit prices documented
- Calculations shown for verification
- Project conditions noted and priced appropriately

Review Process

- Peer review of all estimates >\$50,000
- Senior review of all estimates >\$100,000
- Random sampling review of smaller estimates
- Client feedback incorporated into process improvement

- Continuous training based on review findings

Communication Protocols

Client Communication

- Acknowledge all inquiries within 24 hours
- Provide project status updates weekly
- Notify clients immediately of any delays
- Send final deliverables with detailed explanation
- Follow up within 1 week of delivery

Internal Communication

- Daily team check-ins for active projects
- Weekly capacity planning meetings
- Monthly process improvement sessions
- Quarterly training updates
- Annual procedure manual updates

Technology and Systems

Software Requirements

- Primary estimating software: [Selected platform]
- Backup estimating software: [Alternative platform]
- Project management system: [Platform name]
- Accounting software: [Platform name]
- Communication tools: [Email, phone, video]

Data Management

- Daily backups of all estimate data
- Secure cloud storage for collaboration
- Version control for estimate revisions
- Archive completed projects for reference
- Historical cost database maintenance

Security Protocols

- Password protection for all client files
- Secure transmission of sensitive data
- Confidentiality agreements with team members
- Physical security for paper documents
- Regular security audits

Financial Operations

Invoicing Procedures

- Issue invoices according to agreed schedule
- Track outstanding payments weekly
- Send payment reminders at 15 and 30 days
- Follow collection procedures for overdue accounts
- Maintain accurate financial records

Expense Management

- Track all project-related expenses
- Maintain receipt documentation
- Reconcile expenses with project budgets
- Report monthly expense summaries
- Monitor profitability by project

Risk Management

Error Prevention

- Use standardized estimate templates
- Implement systematic checking procedures
- Maintain current cost databases
- Regular training on industry changes
- Continuous process improvement

Liability Protection

- Maintain professional liability insurance
- Include limitation of liability clauses in contracts
- Document all client communications
- Keep detailed project records
- Regular review of legal protections

Performance Monitoring

Key Performance Indicators

- Project completion time vs. target
- Estimate accuracy vs. actual costs
- Client satisfaction scores
- Revenue per project
- Repeat client percentage

Continuous Improvement

- Monthly performance review meetings

- Client feedback collection and analysis
- Process adjustment based on lessons learned
- Technology upgrade evaluations
- Staff training and development

Emergency Procedures

Deadline Conflicts

- Immediate communication with affected clients
- Negotiation of revised timelines if possible
- Additional resources allocation if needed
- Clear communication of new expectations
- Follow-up to ensure satisfaction

System Failures

- Immediate notification of IT support
- Activation of backup systems
- Communication with affected clients
- Alternative delivery methods if needed
- Post-incident review and prevention measures

Staff Development

Training Requirements

- Industry standard updates
- Software proficiency maintenance
- Client service excellence
- Technical skills enhancement
- Business development skills

Career Path Development

- Skill assessment and gap identification
- Professional development planning
- Mentorship programs
- Performance review and feedback
- Recognition and reward systems

This operational procedures manual ensures consistent, high-quality service delivery while maintaining efficiency and quality standards across all projects.
