MENU PUBLISHING FOR MULTI-LOCATION RESTAURANT GROUPS

Garnsh

One menu. Every location. Published on purpose.

A controlled publishing layer for restaurant groups on Toast: prepare the menu once, preview every surface, publish per location, and roll back if something is wrong.

Investor Deck v3.0 · November 2026 · Pre-revenue

THE PROBLEM

One menu. Four surfaces. None guaranteed to agree.

A 10-location group maintains one menu in Toast and presents it on the website, a hosted page, QR codes and in-store boards — usually by hand.

- **Price drift** Toast says $16.25; the website says $14.50.
- **Dead items** Discontinued items and last season's menu linger for weeks.
- **Wrong location** One location's prices or items appear at another.
- **No safety net** A bad publish leaves a blank board during service.

CUSTOMER

10–50 location Toast groups with a brand to protect.

- **ICP** Regional fast-casual and casual-dining groups, all on Toast, with a marketing or operations owner for menu presentation.
- **Buyer** VP of Marketing, Director of Operations, or the founder-operator.
- **Trigger** A price change, rebrand, new location, menu cycle or agency handover.
- **Why now** Menu data is a discovery asset, signage is cheap, and labor turnover keeps recreating the manual updater.

Below 10 locations the pain is real but the budget is small. Above 50 the sales cycle exceeds a two-person team.

SOLUTION

Publish once. Preview everything. Roll back if wrong.

One menu document

Ingest from Toast or CSV/Sheets. Normalize items, modifiers, prices and location variants.

Per-location control

Map every surface to the right location, with overrides and a group dashboard.

Publishing safety

Preview, deliberate publish, version history, rollback and last-known-good serving.

Gen 1 is menu publishing. Not ordering, payments, live inventory or real-time sync.

PRODUCT

Four surfaces. One source of truth.

The workflow: ingest → normalize → map → preview → publish → serve.

- **Website embed** The group's own site, styled to the brand.
- **Hosted page** A Garnsh-hosted menu per location.
- **QR menu** A phone view opened by a printed code.
- **Menu boards** In-store screens fed from the same published version.

Current stage: working demo. Production build Q1 2027. No customer screenshots are presented as live.

DIFFERENTIATION

The moat is publishing discipline, not menu rendering.

- **Version history** Every publish is recorded; one click rolls back.
- **Last-known-good** A broken upstream source serves the last good menu, not a blank board.
- **Per-location mapping** Prices, items and overrides follow the location, not the template.
- **Audit trail** Brand teams and agencies can see who changed what, and when.

Agencies are the real incumbent. Toast native is view-only. Ordering suites treat menus as plumbing.

MARKET

$14–28M Gen 1 SAM. 3–6% share is a real business.

- **Bottom-up** 189,000 locations × 10–20% in 10+ groups × $61/location/month.
- **Excluded** Ordering, apps and payments are upside, not the base case.
- **Share** 1,183 locations is 3.1–6.3% of the Gen 1 SAM.

189K
Toast locations, Q3 2026

19–38K
locations in 10+ groups

$14–28M
Gen 1 SAM at $61/location

1,183
locations in the 2029 plan

$59 per location. $40 for boards. $1,500 setup.

Item	Price	Note
Core publishing	$59 / location / month	Entry product
Menu boards	+$40 / location / month	Locations with screens
Setup	$1,500 / brand	2h/location; waived for showcase
Gen 2 ordering	+$99 / location / month	Gated on Toast certification
Gen 3 app	$5,000 + $149 / location / month	25+ location groups

- **Setup economics** At 14 locations and 2h/location, onboarding costs $1,680 against a $1,500 fee — a $180 loss. Break-even is 1.79h/location.
- **Validation** Every price is an assumption. Ten interviews before it is fixed.

VALIDATION

Pre-revenue. Zero signed. The next 90 days are the test.

- **Target** 10 design partners; 6 paying at 20% off, 4 free for 12 months.
- **Integrity** No logos, testimonials or pilot results are claimed.
- **Purpose** The first 10 groups replace founder assumptions with data.

0	0	0	40
signed design partners	live locations	paying customers	target conversations

GO-TO-MARKET

Founder-led. Agency-assisted. No paid acquisition.

- **Pipeline** 40 qualified conversations → 10 design partners at a 1-in-4 close.
- **Pilot** 30 days, 3 locations, $59/location; setup waived on annual conversion.
- **Agencies** 25% recurring revenue share. They already handle menu updates and dislike it.
- **Marketplace** Toast Partner Connect only after approval; not in the 2027 plan.

At 1-in-6 close, the same 10 signatures need 60 conversations and roughly 50% more selling time.

UNIT ECONOMICS

One 14-location group: $1,221 gross profit. 1.5-month payback.

- **Churn** 2.0% monthly revenue churn = 1.5% group + 0.5% location; LTV $61K.
- **Downside** 3.5% churn → 13x LTV:CAC. Still investable.
- **Setup** The $1,500 fee loses $180 per 14-location group at 2h/location.

$1,372	$1,221	$1,590	38x
monthly revenue	recurring gross profit	CAC, fully loaded	LTV : CAC

Cash-positive in 2027 only because founders work unpaid.

	2027	2028	2029
Revenue	$42K	$441K	$1.29M
Cash from operations	+$4K	+$164K	+$437K
Economic result	−$21K	+$165K	+$435K
Year-end cash	$24K	$188K	$625K
Net groups	14	46	90
Exit ARR	$88K	$698K	$1.63M

- **Cash floor** The trough is $5,923 in April, $923 above the $5,000 floor.
- **Onboarding** 2027 economic result includes $25,200 of imputed founder onboarding. Paid onboarding exhausts the $20,000.

COMPETITION

Everyone solves a different part of this.

Player	What they do	Gap
Toast native	Websites, ordering, boards	Generic; menus on Toast properties
Agencies	Hand-built sites + manual updates	Slow, manual, expensive
Marqii	Menu sync to Google/Yelp	Distribution, not rendering
Popmenu / BentoBox	Website + menu + marketing	Marketing suite first
Owner.com / Lunchbox	Ordering + websites	Ordering-first; expensive

- **The opening** Per-location publishing control and multi-surface reach without changing POS, website or ordering vendor.
- **The incumbent** The agency, not another SaaS product.

Gen 1 is the company.
Gen 2 is an option, not a promise.

Gen 1 · 2027

Menu publishing. The only product in the base case.

Gen 2 · 2028

Ordering on the group's own site. Gated on Toast certification and demand.

Gen 3 · 2029

Branded app and commerce. Funded from revenue, only after proof.

Critical path: Toast access. Fallback: CSV/Sheets import and a second POS adapter by month 18.

Two founders. $20,000. A deliberately narrow wedge.

THE TEAM

- Two partners, $10,000 each, equal vesting.
- Product/engineering and sales/operator relationships.
- Contract design; advisors in multi-unit operations and POS channels.

THE ASK

- Not raising now.
- Raise after 10 paying groups, ~140 paying locations, measured churn and a clear Toast status.
- Use of funds: engineering, certification, first sales hire.

The $20,000 works only if the founders perform 2027 onboarding. Paid onboarding needs ~$25K more.
